**Reflections on CPD Events** [Click to toggle additional information]
Each Event must be record and reflected upon. This is part of the requirement for your final certification and also for your CPD requirements for the GDC.
Reflection upon the Event will help you to put into context the information you have gained, either from outside speakers or from discussion with your peers and colleagues.

The Events are not just sources of new information but an important part of the process by which you can learn to assess yourself in relation to your peers.

Full completion of this form will help your TPD and VS to review your progress within, and your understanding of, the complexities of dental practice.
