## Training Details

### (Description of post)

#### Overview

The Specialty Trainee (ST) will undertake supervised clinical practice at- Salisbury NHS Foundation Trust with a potential rotation a NHS primary care iMOS practice later in training.

The Specialty Trainee will be based in Salisbury for years ST1, ST2 and ST3 years. Training will be provided by consultant and specialist oral surgeons, Orthodontists, restorative dentists, and oral & maxillofacial surgeons. Training will cover the core clinical competencies of the new oral surgery curriculum and the basic competencies in the management of health care delivery.

Provision of training will be flexible to give the breadth and depth of experience and expertise required to enable the successful trainee to achieve clinical and professional competence to deliver high quality care. To satisfactorily complete this period of training, the trainee is expected to have knowledge and understanding of all components of the curriculum, and competence in the majority.

The programme will provide the following clinical experience;

Exposure to core training in Oral surgery as per curriculum to include but not limited to:

- Oral medicine assessment and management of benign lesions
- Assessment, investigation and onward referral for Head and Neck malignancy
- Complex Oral medicine liaison with Oral medicine consultants and other specialties, incl Dermatology and Rheumatology/Gastro
- Routine and Complex exodontia
- Assessment, planning and management of impacted teeth including canines
- Radiological assessment and management of complex oral surgery to include CBCT, CT and MRI as well as plain films
- Assessment and management of cysts
- Assessment and management of odontogenic infections including onward referral where appropriate
- Assessment and management of TMJ/MFPDs
- Assessment and management of benign salivary pathology
- Assessment, treatment planning and management of peri-radicular surgery
- Assessment and management of dental trauma
- Exposure to and an understanding to management of head & Neck trauma
- Exposure to managing in patient's
- Extensive exposure to Intravenous sedation for ASA 1, 2 and 3 patients in a supervised out patient setting
- MDT working to include Hypodontia, Restorative and oncology

- Exposure and interface with Cleft lip and Palate team
- Exposure to Head and Neck pathology
- Assessment, treatment planning and exposure to surgical and restorative aspects of implant rehabilitation
- Liaison with allied specialties including Oral medicine, ENT, Dermatology, Haematology & Cardiology

## **Duties and Responsibilities of postholder**

### **Clinical**

The Specialty Trainee will access to clinical experience to meet the requirements of the curriculum. This will include new and review patient clinics, operating under LA and GA, with IV and IH sedation, participation in all oral surgery orthodontic joint clinics and others as appropriate.

Patients treated in the secondary care environment include those of increased surgical complexity and medical comorbidities making them unsuitable for treatment in a primary care setting.

### **Teaching**

The trainee is expected to actively participate in the Regional Oral Surgery Specialty Teaching Programme and is encouraged to participate in the weekly Junior staff teaching both in the department and in Grand Rounds.

The trainee will have opportunities to teach other dental professionals both in small and large groups, including both DCTs and VTs.

### **Study/Research**

Study and examination leave allowance are as stated in the Terms and Conditions of Service. Research is actively supported.

### **Administrative**

The routine administrative content of this post is allowed for in the timetable.

### **Audit**

The trainee will be expected to actively participate in local, regional and national clinical audits and quality improvement projects, in addition to the monthly department Clinical Governance Meetings.

The ST is actively encouraged to participate in the Oral Surgery Managed Clinical Networks.

## Description of main training site

### Salisbury NHS Foundation Trust

The Orthodontic, Oral and Maxillofacial Unit is situated on Level 3 in the main hospital. The department was purpose built in 2007 as part of a PFI, within the main hospital site.

The unit provides Orthodontics, Oral & Maxillofacial service, secondary cleft lip & palate care, special needs dentistry as well as maxillofacial prosthodontics. It also houses the Minor Operations theatres for both Plastic Surgery and OMFS.

The oral surgery team within the department is well supported by surgical colleagues who undertake all elements of oral and maxillofacial surgery and provides an implant service for cleft, oncology and severe hypodontia patients. It provides a comprehensive oral surgery service for Wiltshire, West Hampshire and East Dorset, this currently includes level 2 and 3 care. On average the department sees approximately 324 new patients each month.

Within the department, new and follow up clinics as well as minor operations are performed under local anaesthesia alone or in combination with intravenous sedation. Treatment is also provided under general anaesthesia both as day case and inpatient care.

The department has a very close working relationship with the Radiology, histopathology department and other surgical specialities especially ENT and Plastic surgery and the Cleft unit.

The department places a strong emphasis on the training of both DCTs, oral surgery STR and maxillofacial STR as well as providing teaching and education to both Vocational trainees and local dental practitioners.

Odstock is the main ward shared with Plastic surgery while paediatric admissions are to Sarum ward.
