Training Details

(Description of post)

This is a full-time post-CCST training post based between Bristol Dental Hospital and Musgrove Park Hospital in Taunton. This is a full-time post but less than full-time applications would be considered. Indicative timetable is included for the full-time post. Both units hold a full range of MDT clinics which the post holder is timetabled to attend. The post holder is also actively involved in the teaching of Undergraduate Dental Students and there is the opportunity to participate in the teaching of Specialty Registrars in Orthodontics and Orthodontic Therapists in Bristol. Both units are well equipped and have administrative and nursing support.

Some degree of flexibility during training will be necessary to enable exposure to the full range of multidisciplinary clinics. Occasional visits to other units in the specialty are encouraged to improve and broaden experience.

Duties and Responsibilities of postholder

Clinical

The Trainee will have a personal caseload of multidisciplinary and other complex malocclusions and will take a leading part in new patient/review clinics involving a variety of dental and medical specialties.

Trainees are expected to undertake a reflective log of cleft related experience including clinics and theatre, based on previous experience and discussions with the Lead Orthodontist for the cleft service. Orthodontic treatment sessions with children and adults with a cleft can be arranged as required with the cleft team.

Teaching

Undergraduate Dental Students, Bristol Dental School, Trinity Quay - The supervised teaching and clinical training of an undergraduate group of students is an important part of the post. The post holder undertakes this teaching on a fortnightly basis.

There are opportunities to teach on postgraduate training days for a range of dentists and dental care professionals.

Orthodontic StRs. The holders of these posts have a significant role in the running of the regular journal clubs and mock examinations involving more junior StRs.

Study/Research

Study and examination leave allowance are as stated in the Terms and Conditions of Service. Facilities for research are available for approved projects.

Clinical Administrative

The routine administrative content of this post is allowed for in the timetable.

Audit

Orthodontics is a small specialty within the South West Region and so audit takes place principally at a Regional and sub-regional level. Specialty Trainees attend all these meetings and take a full part.

Description of main training site

University of Bristol Dental Hospital, University Bristol Hospitals NHS Foundation Trust

The University of Bristol Dental Hospital lies within the University Hospitals Bristol and Weston NHS Foundation Trust (UHBW) and is situated in the city centre, close to the Medical School and University. The Trust consists of a number of hospitals, including Bristol Royal Infirmary, Bristol General Hospital, St Michael's Hospital, Bristol Eye Hospital, Bristol Royal Hospital for Children, Bristol Haematology & Oncology Centre (BHOC) as well as the Dental Hospital. UHB provides a full range of NHS services in hospitals and the community and is a focus of excellence at a local level and nationally as a centre for NHS teaching and research.

The University of Bristol Dental Hospital is the major provider of dental specialist service in the South West Region, in addition to providing emergency service and undergraduate teaching. Many of the clinical areas have been or are being refurbished. The Chapter House extension enhances the facilities for teaching and research and includes a staff restaurant and lounge.

The Dental Hospital clinical groups are as follows:

- Oral Medicine, Pathology and Microbiology
- Child Dental Health (including Orthodontics)
- Oral and Maxillofacial Surgery
- Restorative Dentistry

The Orthodontic Department has two main functions, firstly the teaching of Dental Undergraduate and Postgraduates on longitudinal courses and secondly, the treatment of child and adult orthodontic patients.

Undergraduate dental teaching is undertaken at Bristol Dental School, a new university development by Bristol Temple Meads Railway Station.

The Orthodontic trainee attends cleft lip and palate clinics in the South West Cleft Unit. The Bristol Cleft Team is, with Swansea, a member of the South Wales and South West Clinical Network for cleft lip and palate care. The Bristol cleft team comprises primary surgeons, secondary surgeons, speech and language therapists, psychologists, feeding specialist nurses and support staff. The team organises and co-ordinates the delivery of an integrated cleft lip and palate service for the South West.

Description of second training site

Musgrove Park Hospital, Taunton & Somerset (NHS) Trust

Musgrove Park Hospital is a 722 bedded District General Hospital providing a full range of acute services.

The Orthodontic Department is a well-established department within the Trust, its principal functions being the treatment of complex cases, including cleft lip and palate patients, hypodontia cases, and those with craniofacial deformity. It is closely linked to the Maxillofacial and Restorative Departments and is located in the Duchess Building on Level 1. It occupies excellent facilities which include a well equipped three chair open plan clinic; a separate single chair surgery; reception and waiting areas; x-ray room with OPT/ lateral cephalogram/ 3D and intraoral machines; model box room; Junior Staff office (shared with Oral Surgery); staff room; Consultants office. The department uses the services of the Orthodontic/Maxillofacial Laboratory located within Musgrove Park Dental Centre, on the DGH site.

Musgrove Park Hospital has an active Academy with three full-time administrative staff. The Academy has been extended and improved in order to provide a new teaching facility for the medical students to rotate to the hospital as part of their training in Bristol. There is a well stocked library with a full-time librarian and the usual audio visual aids and complete research facilities.
